

Solve the subtraction problems below and write your answers in the circles provided.

A subtraction problem within a dashed border. On the left, there are 9 girl icons arranged in a 3x3 grid. To their right is a minus sign and a small empty rectangular box. In the center, there are 6 snow globe icons arranged in two rows of three. To their right is an equals sign and another small empty rectangular box. On the far right is a large circle with a dotted border, intended for the answer.

A subtraction problem within a dashed border. On the left, there are 9 boy icons arranged in a 3x3 grid. To their right is a minus sign and a small empty rectangular box. In the center, there are 6 girl icons arranged in three rows of two. To their right is an equals sign and another small empty rectangular box. On the far right is a large circle with a dotted border, intended for the answer.

A subtraction problem within a dashed border. On the left, there are 9 girl icons arranged in three rows of three. To their right is a minus sign and a small empty rectangular box. In the center, there are 5 boy icons arranged in three rows: two in the top row, one in the middle, and two in the bottom. To their right is an equals sign and another small empty rectangular box. On the far right is a large circle with a dotted border, intended for the answer.
